

Asmita Kolekar

Ontario, Canada | +1 (437) 733-1169 | pphhmd7255@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented aspiring Data Analyst with hands-on project experience in retail analytics, financial analysis, and automated ETL workflows. Skilled in Excel, SQL, Python, Power BI, and Tableau, with a strong interest in supply chain, inventory planning, and business reporting. Brings practical retail operations exposure and a strong ability to turn raw data into clear, business-focused insights.

TECHNICAL SKILLS

Excel (Pivot Tables, VLOOKUP, data cleaning, KPI reporting); SQL (joins, aggregations, window functions); Python (Pandas, NumPy, data cleaning, exploratory analysis, automation); Power BI and Tableau; Business domains: retail sales analytics, financial performance analysis, inventory and demand analysis, ETL and data quality; Tools: SAP MM, ERP systems, Power Query, Git/GitHub.

PROFESSIONAL EXPERIENCE

Cashier, Loblaws | Ontario, Canada | Nov 2025 - Present

- Serve customers efficiently in a high-volume retail environment and maintain accuracy under time pressure.
- Support customers with product availability checks and alternatives, strengthening understanding of demand patterns and stock movement.
- Built practical awareness of store operations, seasonal demand, and inventory flow.

Retail Process Associate, Amazon | India | Apr 2022 - Jul 2023

- Analyzed operational data and reporting outputs to identify trends affecting fulfillment and service performance.
- Supported process improvement efforts through reporting, accuracy checks, and cross-functional coordination.
- Worked with large datasets and performance metrics while maintaining strong attention to detail.

Process Associate, Nvidia AI | India | Aug 2021 - Mar 2022

- Processed and validated large datasets to support operational workflows and reporting quality.
- Improved data accuracy through structured validation and quality-focused review.

SELECTED ANALYTICS PROJECTS

Financial Performance & Cost Analysis

- Analyzed 65,760 finance records and 1,440 budget records across regions, channels, and departments.
- Built variance analysis views for revenue, cost, gross profit, and budget vs. actual performance using Excel, SQL, and Python.
- Created dashboard-ready KPIs and business conclusions focused on cost control and profitability.

Retail Sales Performance & Customer Analysis

- Analyzed 220,000 transaction rows and more than 82,000 customer records to identify category performance, sales patterns, and customer value drivers.
- Used SQL and Python to automate reporting logic and produce insight-focused KPI summaries.
- Designed dashboard views for channel mix, regional sales, customer segments, and top-performing categories.

Automated ETL & Data Processing Pipeline

- Built a pipeline case study using 164,500 raw operational rows and a cleaned reporting-ready output dataset.
- Applied validation logic for duplicates, missing keys, and negative quantities to improve data reliability.
- Documented ETL steps, data quality metrics, and reporting outputs in a GitHub-ready project structure.

EDUCATION & CERTIFICATIONS

Post-Graduate Diploma in Project Management, Algoma University

Bachelor of Mechanical Engineering

Certifications: Microsoft Power BI, SQL for Data Analysis, Professional Digital Supply Chain Management, SAP MM, MS Excel

TARGET ROLES

Data Analyst | Replenishment Analyst | Financial Analyst | Supply Chain Analyst
